Research goal

The development of a dynamic assessment procedure for the Bayley-III

- Measure of learning potential
- Additional and more refined information about the development of the child and sensitivity to different types of instruction. Expected to help tune interventions to the developmental course and potentials of a child and enable better predictions about development
- Target group: children with special needs, calendar age 6-54 months
- Pilot research (n=15) conducted at the moment. Main research (n=85) in 2011-2013

Test format

Week 1:

- Pretest: standard instrument

Week 2:

- Training of negatively scored items
- Posttest: standard instrument

Help given in 4 steps:

- Repetition
- Explanation
- Demonstration
- Doing together (hand-over-hand)
